Hi Kailash Sir,

As discussed with Ganesh Sir, the change will be template/pdf design base.

As per phone discussion.
Below changes are required.

1) status field is fixed in template
Please find screenshot of main template design.
change background color of status field.
template name : Axis Bank - EBC- RV
define status options

2) in pdf export design define color
Edit PDF Export Assign
see screenshot

3) in export pdf change background color of status with given colors

Hi,

Please update status

Posted By : Jayant Singh
Assigned To : Dipika Yedge
C104 Emergency
Date & Time : 26-12-2019 11:27:AM

1) status field is fixed in template
Please find the screenshot of the main template design.
change the background color of the status field.
template name: Axis Bank - EBC- RV
define status options

2) in pdf export design define the color
Edit PDF Export Assign
see screenshot

As per the given requirement,

I worked with the database to add a new column in pdfexportassign.
In pdf export page added a new form field to take status and color field from the user.

and now the values are stored in the database field with a comma-separated form successfully.
now I am working on-

when fetching it, use match field name and use value and store in key: value pair or as JSON format.

Hi Kailash

It is pending for long time and it was discussed that this project should be done from the Shimbi team to avoid delay...

Hello **Manas Sir**,

Please work on the remaining task, I have a swelling on my finger and not able to work for two-three days. Until I will move myself to bug **B412** where I have to just find the issue through Debugging.

Date & Time : 06-01-2020 04:35:PM

Hello mam,

Changes are uploaded in country demo server. Please check. Also note below points :

- 1) Change is for Country India only.
- 2) As discussed on phone today change is applicable for all template design, not as per above given template ids.
- 3) Color entered in PDF Export Assign module can be css supported color names(Ex : red,green,blue etc) or color hex codes(Ex#000000,#ffffff).
- 4) A div tag is used to change the background color of the case result : text instead of the entire <td> tag since the <td> tag is also dynamic it may or may not be present also the <td> tag might already contain style attribute from before i.e in pdf export design which can again cause conflict on tag replacement.
- 5) For "Export/Send to client" one more query will be executed from fetching pdf export assign data which was not there before thus adding additional time during export/send to client.

Please check once before upload in live server.

Hi Manas,

As discussed, colour coding (background colour) of the cell should be added to entire cell right now it shows only around text for pdf design reports
