Import of closed cases

---

What will happen if i do as below, will there be any technical implications?

- 1) Import the case with all the case data & with the column of case\_status as 'Close' value
- 2) Send to client will be done immediately after import

Yes.

If user put value of case status field as 'Close' then case will be visible in send to client tray.

For parent case, all cases of same parent should be closed in import.
