Images required

---

Images required for the attached list of 5974 cases in a separate folder.

Upload it on the ftp server, details below:

Address: <<ftp://103.8.127.41/>><ftp://103.8.127.41/>

Username: resoft

Password: resoft@2233

It was discussed that it will take one day, hence please do this tomorrow. One day additional delay has been added to task list. Please add in your tracker as well.

Confirm once data is uploaded on ftp.

In case of any queries, clarify today as the data needs to be shared with client tomorrow.

Hi Navika,

We can restore the images of last 6 months only by tomorrow, images older than last 6 months need to send request to cold storage first, it may take one day extra to receive files from cold storage.

These cases are for client Make My trip client since 21 Apr, hence retrieval from cold storage will not be required here.

It will be done tomorrow?

Copied images in a separate folder(mmtimages) on same domain(pms.resoftech.com).

After that tried to download that files on local server but it was very slow.

Tried another option that copy images from one domain to another domain using script. But it was also slow.

Discussed it with Navika and Kailash sir.

Finally created a .zip file of folder 'mmtimages' on pms.resoftech.com .

You can download it.

The zip is 5.21 GB and we are facing difficulties in downloading it.

The file was to be uploaded on ftp. it could have been split in further folders for easier transfer and loading.

Will close this requirement once i am able to successfully download the data.
