Hi dipika

I had request you to post a requirement document on the subject.

If you are not clear of the format please contact Ajit or me directly

Hello,

As discussed with Dipika maam and Manas sir,

Following will development process for above requirement.

Pdf design will be same summary page. But to show verification type count of case ids, we need to add below string in pdf summary design :

[VT_COUNT_TABLE]Verification Details[/VT_COUNT_TABLE]

This string will be replace with table of verification type name and there corresponding count of selected case id during export or send to client.

Verification Details will be heading of table it can be any text.

Maam please confirm with above process.

This task will take **3 working days till demo server**, if any task comes in between days will increase.

Hi,

Checked with case ID 109103060 to 109103065

Table shows proper on summary page

Please upload the changes on live server

Hello mam,

Changes are uploaded in live server for both India and Dubai. Also to note change is for all activity not just RCU.
