Data storage

Hi,

For Dubai last 6 months data to be stored online and rest of the details to be parked offline.

However basic required fields for the dedup like Case ID, Refer # , applicant name, status etc. should stored online for above 6 months data to ensure dedup run successfully and other non required details ,images should be parked on the offline. This requirement to be implemented for the INDIA and Dubai operations.

Hello,

Will have to discuss with Sir Kailash before any changes or updates. Once done will post here.

Also is this point related to D196 ?

Hello mam,

This point is related to D196, will continue point discussion there. Close this point and update changes there please.

Also discuss with Sir Kailash for case id fields backup.
