Loading Image On List Page

---

Hi,

We have modified the code to show the loading image on list page while system fetches the records from server.
This change have been uploaded on demo site on all verification list pages and in export module too.
Please verify and confirm it.
The loading icon image will appear at the time of search, pagination and sorting.
Please find attached screenshot of its view.

⭳ Download

ok, Hope it will not further delay the loading of pages.

please upload on live.

Hi,

I wanted to know one more thing, the changes(search as per created date range) which I have did in export module same as reports module(Uploaded it on demo site).
Should we do the same in send to client module on live site?
