PDF assignment

Hi,

As discussed with Kailash Sir, in pdf assignment we require below changes

If there are 2 pdf assignment (OLD & New) for same combination (Client + Product + VT)
old one is inactive and New one is active.

Old cases pdf should view in old pdf format and new cases should view in new pdf format.

Date & Time : 05-08-2019 12:02:PM
Hello mam,

As discussed with Sir Kailash we will add a new date filed in PDF Export assign as "Export Old PDF date limit".

When 2 pdfs will be found for same case id then :
1) If the created date of the case id is greater than the "Export Old PDF date limit" then new pdf will be used for download export,send to client.

2) If the created date of the case id is less than the "Export Old PDF date limit" then old pdf will be used for download export,send to client.

3) If the "Export Old PDF date limit" field is left blank then new pdf will be shown no change here.

Query : 1) Will this change be only for country India or Dubai also ?
          2) Please check if above process is feasible.

Discussed with Deepika mam and Manas sir, old cases will use old pdf export assigned format and when new pdf export assign created then from that new cases will use that new pdf export assigned format.
During generating pdf of a case following conditions will be checked
1)all combination entries will be captured from pdf export assign table for the case combination fetched in desc format
2) it will check date
3) based on <> condition export assign format will be selected
4) pdf generated for the case using selected pdf export assigned format

A) MASTER SIDE CHANGES for both countries(India and Dubai):
db changes:
1)pdf export assign meta table:
INSERT INTO `tbl_mst_pdfexportassign_meta`
(`field_name`,`field_label`,`field_type`,`field_options`,`field_validations`,`field_default`,`field_foreign_key`,`form_show`,`list_show`,`list_search`,`list_order`,`onchange`,`
VALUES ('export_old_pdf_date_limit','Export Old PDF Date Limit',10,NULL,NULL,NULL,NULL,1,1,NULL,NULL,NULL,NULL,NULL,2);

2) pdf export assign table
ALTER TABLE `counpama_country_11`.`tbl_mst_pdfexportassign`
ADD COLUMN `export_old_pdf_date_limit` DATE NULL DEFAULT NULL COMMENT '' AFTER `pdfexportassign_report_show`;

fire url to create json:domain/admin/verify/all_master_json/pdfexportassign
add/edit page date element added

B) fetch pdf in progress
url:domain/user/downloadreport/createpdf/caseid

model with existing function to fetch template id for combination:
$this->Templatemodel->fetchTemplateid_down_common

Note: above information is only for reference, changes is still in development process

Hi,
Discussed with Manas sir about following issue.

Issue: how to get correct template for pdf report
-currently condition for selecting correct template is based on combination with status enabled
-only one template is enabled at a time

issue:
1)if we search template based on status, it will fetch only one template which is enabled, and not other template which we need for old cases. So only one entry will be fetched.

2) If there are more than 2 pdf export entries, then how new field 'export_old_pdf_date_limit' will be used to get proper template from multiple old templates.

Provide suggestion with confirmation from Deepika mam/ Kailash sir for further development as i am getting above issues for generating pdf.

Date & Time : 23-09-2019 02:28:PM
Hello,
as discussed with Kailash sir and confirmed from Deepika mam that following changes to be implemented.

- Add two date range for pdf export assign template :from_date and to_date,
- The template will be selected based on created date of case which comes within from and to date range of template
- for latest template the range will be from date : current date and to date will be null (since there is no specific limit for new template)
- when adding new template, old template of same combination must contain from and to dates

Note: above information is for reference only and changes previously done will be completely removed as it is complete new change

Hi,
 New DB changes 23 sept 2019:---
Insert Queries:
INSERT INTO `tbl_mst_pdfexportassign_meta`
(`field_name`,`field_label`,`field_type`,`field_options`,`field_validations`,`field_default`,`field_foreign_key`,`form_show`,`list_show`,`list_search`,`list_order`,`onchange`,`
VALUES ('active_from','Active From',10,NULL,'required',NULL,NULL,1,1,NULL,NULL,NULL,NULL,2);
 INSERT INTO `tbl_mst_pdfexportassign_meta`
(`field_name`,`field_label`,`field_type`,`field_options`,`field_validations`,`field_default`,`field_foreign_key`,`form_show`,`list_show`,`list_search`,`list_order`,`onchange`,`
VALUES ('active_to','Active to',10,NULL,NULL,NULL,NULL,1,1,NULL,NULL,NULL,NULL,2);
ALTER TABLE `tbl_mst_pdfexportassign`
ADD COLUMN `active_from` DATE NULL DEFAULT NULL COMMENT '' AFTER `pdfexportassign_report_show`,
ADD COLUMN `active_to` DATE NULL DEFAULT NULL COMMENT '' AFTER `active_from`;

Revert Queries:
1)DELETE FROM `tbl_mst_pdfexportassign_meta` WHERE `field_name`='active_from';
2)DELETE FROM `tbl_mst_pdfexportassign_meta` WHERE `field_name`='active_to';
3)ALTER TABLE `tbl_mst_pdfexportassign`
DROP COLUMN `active_from`,
DROP COLUMN `active_to`;

- Fetching template id for report view (inprogress)

Note: above information is for reference.

Date & Time : 24-09-2019 04:47:PM
one issue :
 how to fetch pdf for following both scenario
1) combination + active from date + active to date
2) combination + active from date + active to date Null

Following is the query:
SELECT
    pdfexportassign_template_id
FROM
    (`tbl_mst_pdfexportassign`)
WHERE
    pdfexportassign_country_id = 11
        AND pdfexportassign_activity_id = 13
        AND pdfexportassign_veriftype_id = 12
        AND pdfexportassign_client_id = 41
        AND pdfexportassign_product_id = '29'
        AND DATE_FORMAT(DATE(active_from), '%Y-%m-%d') <= '2019-03-29'
        AND DATE_FORMAT(DATE(active_to), '%Y-%m-%d') >= '2019-03-29'   // issue is at these 2 lines
        OR active_to IS NULL

Issue: I think above query will fetch record having active to date value some date or active date value to null, but mostly it will capture null value so again there are mismatch chances based
on active to some date and null value

FINAL QUERY TO FETCH pdf template id

```
------------------------------------------------------------------
    pdfexportassign_template_id,
    if((DATE_FORMAT(DATE(active_from), '%Y-%m-%d') <= '2019-03-29') AND DATE_FORMAT(DATE(active_to), '%Y-%m-%d') >= '2019-03-29',1,0) as 'old',
    if((active_from is null OR active_to is null) AND (pdfexportassign_status=1),1,0) as 'new'
FROM
    (`tbl_mst_pdfexportassign`)
WHERE
    pdfexportassign_country_id = 11
        AND pdfexportassign_activity_id = 13
        AND pdfexportassign_veriftype_id = 11
        AND pdfexportassign_client_id = 43
        AND pdfexportassign_product_id = '22'
------------------------------------------------------------------
$select="pdfexportassign_template_id, if((DATE_FORMAT(DATE(active_from), '%Y-%m-%d') <= $created_date) AND DATE_FORMAT(DATE(active_to), '%Y-%m-
%d') >= $created_date,1,0) as 'old',
    if((active_from is null OR active_to is null) AND (pdfexportassign_status=1),1,0) as 'new'
--------------------------------------------------------------------------
```

Logic to capture template id
if multiple results then execute loop
        if result contains old matching templates then fetch and break loop first else
        fetch new only
else return single template id

For developer:
FINAL COMPLETE CHANGES:R70 PDF assignment on countrydemo INDIA and DUBAI

A)**DB Changes for both countries**:---
Insert Queries:
INSERT INTO `tbl_mst_pdfexportassign_meta`
(`field_name`,`field_label`,`field_type`,`field_options`,`field_validations`,`field_default`,`field_foreign_key`,`form_show`,`list_show`,`list_search`,`list_order`,`onchange`,`
VALUES ('active_from','Active From',10,NULL,'required',NULL,NULL,1,1,NULL,NULL,NULL,NULL,2);

INSERT INTO `tbl_mst_pdfexportassign_meta`
(`field_name`,`field_label`,`field_type`,`field_options`,`field_validations`,`field_default`,`field_foreign_key`,`form_show`,`list_show`,`list_search`,`list_order`,`onchange`,`
VALUES ('active_to','Active to',10,NULL,NULL,NULL,NULL,1,1,NULL,NULL,NULL,NULL,2);

ALTER TABLE `tbl_mst_pdfexportassign`
ADD COLUMN `active_from` DATE NULL DEFAULT NULL COMMENT '' AFTER `pdfexportassign_report_show`,
ADD COLUMN `active_to` DATE NULL DEFAULT NULL COMMENT '' AFTER `active_from`;

Revert Queries:
1)DELETE FROM `tbl_mst_pdfexportassign_meta` WHERE `field_name`='active_from';
2)DELETE FROM `tbl_mst_pdfexportassign_meta` WHERE `field_name`='active_to';
3)ALTER TABLE `tbl_mst_pdfexportassign`
DROP COLUMN `active_from`,
DROP COLUMN `active_to`;

Imp: fire url to create json:domain/admin/verify/all_master_json/pdfexportassign
----
B) **Files changed:**
1) controller:user/downloadreport
function:createpdf()
added call to new function fetch_assign_template_id() to get assign template id
2) model:templatemodel
new function:fetch_assign_template_id()
to get template id based on new logic

For Ops team:
Changes uploaded on demo server please check and confirm for live.

MODULE:PDF EXPORT ASSIGN
new template will have active_from/active_to blank value with status enable
old template will have active_from and active_to dates mandatory

Hi,

As discussed, we can not update From date as we don't know when the old pdf assignment done.

Either show it on listing page or by default add it, from pdf assignment created date.

Hi,
For developers:
query to display created date on list page for both countries:
UPDATE `tbl_mst_pdfexportassign_meta` SET `field_label`='Created Date',`list_show`='1' WHERE `field_name`='created_date';

For OpsTeam:
changes to display created date on list page uploaded on countrydemo for both countries.
please check and reply for live upload.
