Ganesh Sawant | MySql Version upgration for the pmsdubai

Hi Manas

As discussed, during our review we have noticed that the Mysql version available on the live server is 5.7.6 whereas the current version is 8.0.28.

Please check if we upgrade the MySql version on the server, will be there any compatibility with application.

Hello sir,

I have discussed with Sir Kailash for the mysql version update of **Dubai** server, we have to check in local first and then update if all ok else make changes where necessary.

And before upgrade backup of all server parameters in case any issue.
