Ramakrishnan V | Auto inactive user in the RES if no any activity done in the last 30 days

---

Hi Manas

We want user to be deactivated in the RES automatically if no activity done by the user in the last 30 days.

Hello sir,

Queries:
----
1) Please let us know which actions are to be considered as "if no activity done".

Example: Case submit from Mobile app, Case add/edit/import , Master data add/edit (Supervisor, Ops Admin, Pamac Admin ...)

2) Are all employee designation to be considered for auto de-active or will there be any exception (like vendor, vendor employee etc..).

3) Also de-active won't mean delete employee data will be present still only status will be de-activated.

Hi Manas

If user has not login into the portal in the last 30 days then same to be consider as no activity done and it should get de-activated.

Yes all employee designation to be considered for the auto de-active

Only status to be deactivated which will not allow user to login. If in case of user status to change from de-active to active it should allow.

Hello,

As discussed today , please avoid n+1 query as it will execute multiple queries in server in loop, use where in ()
for update after fetch all emp ids using date comparison query. Total 3 queries i think will do.

Approved.

Please move the code first to DEMO and also create a schedule for running the CRON job in DEMO.

The schedule should be run every day in the night.

During the first run many cases will come, but on the second day onwards the number of cases will be low.

Hope you are saving the date of disabling. Based on the same, we can later take a count of records done on a couple of days in Demo.

Once successful in DEMO we can move to production.

Hi Sir,

In previous your code approval will be executed for only local server.

But currently i changed the code and make it dynamic , same code will be executed for Local server, Demo Server as well as Live server

so Kindly check code and give me approval for same.

Hello sir,

Observation: As observed can we make exception for Super Admin login to avoid status update to in-active for this task.

In case Super Admin login is not done for more than 30 days then, we will have to update it from backend db query as the Super Admin user doesn't show in employee master menu.
