Latlong and FE tracking

Requirement # 1

Google Address latlong checked against the Latlong captured by the FE. If there is any difference then same should be reflect in the report as "Yes" Once the Supervisor update the justification and cure then only it should allow to mark the case as send to client.

Requirement # 2

Live movement tracking of FE on the mobile application

Feel free to discuss in case of any clarification required.

Hi,
Need to discuss with Kailash sir, Comparison of Latlong will be time consuming task and since actual address Latlong values how we can get, we have only Latlong values from FE.
There will be more chances/always having different values for actual latlong and FE captured latlong.

Hello,

Shaikh as discussed please update your queries here before starting any development with timeline.

Hi,
As discussed with Manas sir, lat long can't be matching due to difference between actual address and fe captured address so , we need to provide area limit i.e withing 50 meter or some distance value if the fe captured lat long falls in that range then it is correct lat long else it is wrong, you can also test if you check our PAMAC Mumbai office is in Shriram estate building that will show some lat long value and a person which will capture image of that building from outside of that then there is difference between both of the lat long values and it will be mostly present.

Please confirm or suggest on this.

Hi, as discussed with Deepika mam , suggested only to view the address location lat long values and FE captured values using template and no need to implement area range logic needed discussed in above post.

Discussed with Manas sir, needed fixed fields for the address to capture lat long for the entered address so it is required to fix in coding. For any query please Deepika mam discuss with Manas sir.

Hello mam,

Please let us know a fixed address field which we can use in template to get the lat/long of the address entered in that field and show the values in case edit.

Query : Also do you require this lat/long to be shown in pdf or mis ?

Hello Shaikh,

We have received the address fields (resi_add1 and off_add1) which are to be used to show lat and long. Please make changes accordingly. And update your task list.

Ok mam, if it is of higher priority please mention here, will start development once older pending points are closed.

Will have to finish Shaikh points in live first, before adding anything new.
