Dipika Yedge | Max Images per template

Hello team,

This thread will be used for discussion for max images that is used in template design in current operation and also to set limit to decrease pdf generation while export.

Hi,

As of now we are using max 20 images in template design.

Some PD clients requires 30 images also.

On Live Demo test time required to generate one PDF of

10 images for 100 PDF
20 Images for 100 PDF
30 Images for 100 PDF
50 Images for 100 PDF

and post here

Hello sir,

No, it is not done, currently working on D266 on priority basis.

Note: In footer we have added time taken for script execution and memory consumption, if we have test data in demopms.resoftech.com server then we can check it there only for a single user.

Request PAMAC to add the max test required i.e 50 images for atleast 100 pdf designs in demo server, so that we can check.

Also import atleast 200 cases and keep them in send to client menu.

Please provide the necessary in demo server and ask Manas to get this tested and then we can take a call.
