Fields Not displayed in App list | Emergency

Hello Bhavana,

In template name ="Aditya Birla Finance - CPV - RL - RV NEW" some fields are marked as App List show but in listing its showing "NO" .
For reference Please check field

| 11 | applicants_name | Name of Applicant | Inputbox | Yes | No | Yes | 9,1 |

Template Id is https://pms.resoftech.com/admin/template/index/819

Please check on urgent basis .

Currently working on R23, will check tomorrow morning as will have to check the template in local file to perform die operation, cannot do it in live server.

Today as per priority had to update R23 (some changes) in demo server, to test.

Also please tell which webservice and function name should i use to check it, and can i perform die operation to debug ?

Hello Bhavana,

There is no issue in webservice.
please check attachment or call me

I have checked the global "`tbl_template_global_meta`" here their are 2 fields :
"list_show" and "app_list" . When we check the "App List show" the "app_list"
field gets updated which is ok, but the list_show remains blank.

Field "list_show" is shown in List and not "app_list" that is why it is showing No for the "applicant_name" field.

Query : Has their been any functionality earlier to update the "list_show" for fields was it removed or updated later ?

Hello Bhavana ,

I updated field "applicant_name" for disable the "list show" and again enable the "list show".
Still its showing "List show" as "NO"

App List show is different then List show. There are no options for List Show as i have checked for template design. If their is any option , then which checkbox is it ?

App List show has field "app_list" in table which gets updated when we check it. But "List Show" , there is no option i can find in the template design, where did you update it from ?

Also for every field "List Show" is showing "No", is their a way to update it from where or is it not used anymore ?
