Sub center is mandatory even if there is no sub center for the center | Emergency

---

Attached are the screen shots and import file.
Example - chennai center doesnt have a sub center, still its shows the error.

please check and resolve.

Issue have been resolved.
There was one line of code was missing which checks the value coming from third table is valid or not, this should be check if value is there.
Now I have put that condition before checking this.

Please verify and confirm.

Rakhi,

We had tested it on live site as well. Even the operations team had tested after my testing.

testing was not done properly on live site.
Please provide test data which you tested on live site.

Point 20 tested ok on live.

Test case details below for reference:
Client: Test
Product: Home Loan
Activity: CPV
VT: RV & BV
Import file attached.

I had used the same file and if in case it had shown error earlier then i would have said at the time of testing only.
And would not have commented that testing was okay.
Cant help if you dont trust us when we say that we have done testing and fortunately for this point i had the test
cases uploaded in myproject, which i generally dont.

Closing the bug, with a hope that the error will not be repeated.
