May we use zoom with static map to show some more property around customer location?
current request
https://maps.googleapis.com/maps/api/staticmap?
format=jpg&scale=1&size=800x300&maptype=roadmap&markers=color:red|label:|25.4027167,55.4984871&key=AIzaSyBEx6SZ0kvKTMe7NTgU1SJwi9cAIYepHUk

with zoom request will be
https://maps.googleapis.com/maps/api/staticmap?
format=jpg&size=1200x800&zoom=19&maptype=roadmap&markers=color:red|label:|25.4027167,55.4984871&key=AIzaSyBEx6SZ0kvKTMe7NTgU1SJwi9cAIYepHUk

If it is ok, can we implement it for dubai?

Hello Kailash Sir,

Previous one our implementation same like that, but still we get some balnk google maps .Then For proper display location we changed the zoom parameter values.

Then For solve this solution we are working on near by location map, In that we showing nearby places and also shows nearby places on inforwindow.

There is need to generate the map with-out zoom parameter value.

We can do one thing we can use visible parameter in url .

Hello Shaikh,

Can you create one excel in that included "Latitude,Longitude","Existing calling " and another one "Visible api calling".
So we can compare with existing map with new api calling .
List out minimum 20 Lat'Long . Then we can share with them (Mumbai Team, Dubai Team,Ganesh Sir and Prashant Sir)
After confirmation we will update the url.
