Mobile app issue - Incorrect heading of the template

For multiple clients (Shubham Housing HSBC, Siemens) we are facing the issue in app as below:

The header of another template is shown in web list for other form, for eg. Refer attached screen shot where Shubham BV as well as RV is taking heading "Shubham Housing – RV"

After opening the form, the template taken is correct, but the app list view is incorrect.

Please resolve this on top priority.

Issue arise because Mobile APP was not tested properly with multiple
clients and multiple verification types for same FE.
One templates label are overwritten by other templates label.
We change in web-service, no need to change in Mobile APP.
