Http to Https

Please let us know the efforts and cost involved in the transition.

You need to purchase a SSL certificate.
And need to do changes in web application, webservices, APIs and APK for URLs.

You can contact to Siddharth sir for more details about SSL certificate.

Okay. Have asked Sid Sir.

No of days required to do this after the purchase?

No of days required to do this after the purchase?
- It will take 1 day to do changes in web app only.
For mobile app, need to discuss it with Sandeep.

Cost of INR 2500 annually for SSL certificate is okay.

@Sandeep - Discuss whatever necessary.

Please schedule work on this and close on Monday 22 May 2017.

Let me know if not possible.

There will be changes in URL for Api's we have created for clients and also webservice URL but only after application of SSL.

In order to apply SSL certificate, please discuss with Sir Siddharth Deshmukh first.

Today we shall update HTTP to HTTPs for Pamac live site.. Please let all your clients know to use HTTPs url instead of HTTP, (ex : RSIL) . They should use HTTPs now inorder to send data. Also if mobile app is using HTTP please use HTTPs call now. We shall update today once done.

I have checked with ID 102985155 in Export tray, it is working now. It is not an issue of HTTPs..

The issue occurred because of the image path which was not complete. During PDF Design /ckfinder/userfiles/images/india.png was used to include the image path for PDF Template : Indiabulls HL BV which is incomplete.
The image must have been added using ckfinder plugin as such path is partial. Screenshot attached.

I have added full path for the image in the PDF Template, now https://pms.resoftech.com/ckfinder/userfiles/images/india.png. It is working now.

It was working properly earlier. Also, no changes had been made to pdf templates.

There were other instances also. Let me know if you need sample case IDs for checking.
