Point 89 - Search option to client | Medium

This option is seen to the client designation.

89	Restriction of case view for client login	top left search will not be visible to employee of designation 'client' .

[⬇ Download]

Queries :

a) What is 89 over here.

b) Restriction of case view for client login.
Will employee of designation type client won't be able to see any cases in dashboard after login. But if any menu containing case data is assigned to Client employee then case data will be shown. No restriction there, it will depend on admin who assigns the menu.

Is this ok ?

c) top left search will not be visible to employee of designation 'client' .
Ok.

Point 89 refers to the point number in the task list. Refer that.
This requirement was a task and already done earlier, then why the issue again.

This is security issue as one client can see cases of other clients as well through this search option.

Not started yet. PDF attachment module requires thorough testing as changes are on master side. It might affect other modules for filed_type file. I shall work on this when i won't be testing PDF attachment module.

Date & Time : 12-05-2017 11:22:AM
The other engineer is making changes in code. Will prepare and update files in demo server and once confirmed there will put in live copy and test there once again.

I have updated changes for : top left search will not be visible to employee of designation 'client' in live site.
Please check.

Why had it gone?
Posted By : Bhavana Pachpande
B290
Date & Time : 18-05-2017 01:51:PM
Condition for checking employee type client , was not applied for search term. I have checked type instead of id. Now it won't show for client type, not just for an id.

How did it hide earlier when it was tested at first? Why and what did we change after first testing of this point?

Date & Time : 18-05-2017 02:25:PM
We used type instead of id, checked it from session variable.

If you read the initial requirement, it was for employee with Designation as 'Client' should not be able to see the misc search option.

Here which id are you referring to? Specific RES IDs created?

Did not understand, please call to discuss or elaborate more.

Here employee id which was stored in session during login was checked, so i changed it to employee type.

So earlier development was incorrect?
Posted By : Bhavana Pachpande

Date & Time : 18-05-2017 03:39:PM
No ,maybe it was a typing mistake while changing live files. In demo type is checked not ID. But in live it was id.
