Ramakrishnan V | Required Auto logout to be set for the INDIA

Hi

As highlighted in meeting dated 25th April 2023, please make note that post shifting the AWS server, auto session logout is not working for INDIA Operations due which user remain active on the portal.

Request you to please check the same and implement auto session logout after 10 min if no any activity done. This should be activate only for INDIA

Kindly get it done this at the earliest to avoid the monthend RES issue.

Hello sir,

As discussed with Manas sir,

Timeout functionality was added in 2017(refer **D157**) and to keep user session alive functionality was added in **2018,** which send request to ajax after every 10 minutes and regenerates session (refer **R21**). After that no coding change were made for session timeout and if keep session alive on any mouse event or any other client side activity as suggested by Ramki sir, it will create lot of pressure on server.

To check how session work in PHP please check link below
https://stackoverflow.com/questions/1535697/how-do-php-sessions-work-not-how-are-they-used

Please find attached image file for your reference.

Hi Team

If user session is completely idle then it should logout or else session should be active.

It should allow to increase the time session limit if required

Hello Prasad,

Please check and update all possibilities for this task, as we need javascript event to detect if user triggered any event in dom.

Please list all dom events here when the session should renew in server side.

Hi

Please check whether any such work has been done by Prasad and kept with you or kept in demo and let me know
