Old pdf showing | Emergency

Hi,

As discussed, we have make inactive the old pdf assignment
And added new assignment but still showing old pdf in case verification,

Activity- RCU
Client- Suryoday Small Finance Bank Limited
Product- MSME
VT- BV
Case ID- 105697321

Date & Time : 29-06-2019 03:19:PM
Hi,
As checked in coding there is combination of activity,client,product and verif type but not status, hence it is taking old pdf export design whichever it finds first.

(For Developer)
Condition added for status in
model:templatemodel
function:`fetchTemplateid_down_common`()
type == pdf condition
appended status condition to where statement

(For Ops Team)
Changes uploaded on countrydemo, please check and confirm for live.

Hi,
as suggested new change from Deepika mam, that pdfexport assign module not allow any duplicate entry with same status (enabled).
Changes is for
1) both countries: India and Dubai
2) module: pdfexportassign only

Changes(For Developer):
1) A restriction is added at the new add pdfexportassign if same combination is already enabled.
db changes:
UPDATE `counpama_country_11`.`tbl_mst_pdfexportassign_meta` SET
`field_validations`='required|callback_duplicate1[pdfexportassign_client_id#pdfexportassign_activity_id#pdfexportassign_product_id#pdfexportassign_veriftype_id#pdfexp
WHERE `meta_id`='4';

fire this in browser to create updated json file:
domain/admin/verify/all_master_json/pdfexportassign

2) Restrication at list page of pdfexportassign module while enabling design. A message will be shown if already enabled combination found.

-controller:admin/master
function:change_status
added pdfexportassign B395 changes for only status:1 and module: pdfexportassign

-view:admin/master/list
aadded ajax request changes for B395 and else condition.

-model:mastermodel
added two new functions
1)check_duplicateEnabled
2)check_combination

(For Ops team)
Changes uploaded on countrydemo for 11 and 12 countries please check and confirm for live.

Hi,

Now we are not able to view old pdf reports.

The STATUS restrictions should be only for template/pdf,excel assignment.
Posted By : Khamroddin Shaikh

Date & Time : 04-07-2019 05:32:PM
Hi,
It is for that only, as there will be only one template of matching combination will be active at a time.The active pdf report will be displayed only, there is no old or new pdf report display but only active one.

If same combination exist then it will take only one records(first one or last one).
Current program logic it will take first one.
Let me know do you want to change logic?

Application didn't understand old cases , we need to define date (before that date, cases will be consider old) in template design.
It will take some development and testing efforts.

Hi,

Discussed with Deepika mam and Manas sir, New change:

1)at add page allow new pdf export assign combination if other combination except template id already enabled, i.e. other template but same combination containing product,activity,client,verification type should be allowed.
2)If at add page all combination is same including template then it will show duplicate error.

3)at list page of pdf export assign
status change based on combination except template id
pdfexportassign_product_id
pdfexportassign_activity_id
pdfexportassign_client_id
pdfexportassign_veriftype_id

it will check for product,activity,client and verification type entry to enable pdf export assign.
Note: only 1 PDF export assign must be enabled at a time.
User have to disable (Manually) all other pdf export assign entries else there will be mismatch in generating pdf.

Above information is only for reference.

(For Developer)
change:
model:mastermodel
function:check_duplicateEnabled

removed pdfexportassign_template_id from select query
Posted By : Khamroddin Shaikh
C98
Date & Time : 05-08-2019 03:46:PM
(For reference)
Add/Edit page same validation as list page (product,activity,client and verification type entry to enable pdf export assign)

Existing
field_validattion:required|callback_duplicate1[pdfexportassign_client_id#pdfexportassign_activity_id#pdfexportassign_product_id#pdfexportassign_veriftype_id#pdfexport
New
field_validation:required|callback_duplicate1[pdfexportassign_client_id#pdfexportassign_activity_id#pdfexportassign_product_id#pdfexportassign_veriftype_id#pdfexport

Final Changes:
New Query:
UPDATE `tbl_mst_pdfexportassign_meta` SET `field_validations` =
'required|callback_duplicate1[pdfexportassign_client_id#pdfexportassign_activity_id#pdfexportassign_product_id#pdfexportassign_veriftype_id#pdfexportassign_status]'
WHERE `tbl_mst_pdfexportassign_meta`.`meta_id` = 4;

Update meta json:
domain/admin/verify/all_master_json/pdfexportassign

changes uploaded on demo please check and confirm for live
