Hi,
Discussed with Manas sir, it needs to upload image first on live server, then that image can be added to respective template of dubai country, hence Manas sir will reply once changes done.

Hello,

This is for Dubai right ? We shall upload the image and fix the path in the pdf design. Thus it will appear for every pdf export related to this template.

Query ? : Why are we not using case table fields to store the image path i.e not using case id to upload the image and mention the field name in pdf export design ?

Hello,

As per our telephonic discussion changes are updated in live server, please check and confirm.
