Import the data of Employee Rate and Pincode.

Hello Kailash Sir,

As discuss please upload the data of Employee rate master and pin-code master from server's folder DB backup/upload_data.zip file.

First import the Pincode master file =File name "Upload_data/Pincode.xls" for adding new pincode.
Second import the employee rate master file =File

- Upload_data/FE Payout Per Case_DCR.xls
- Upload_data/FE Payout Salaried_DCR.xls
- Upload_data/New Rate Master 28.04.18.xls

Please import it.

Hi,

As per our phone discussion import of the given sheets for pincode master and employee rate will require to create a script and check for validation to insert data on live server, like duplicate pincode entry, or same pincode already present in system.

This will require time we shall update changes in live tomorrow as we correct the excel sheet and script.

Date & Time : 02-05-2018 03:48:PM

Point 1) I have checked the excel sheet for import pincode master. Please correct and upload the excel sheet again given in the attachment with the following errors corrected . Please correct this validations first in the provided excel sheet otherwise we won't be able to upload. We will have to test the script in local and then upload on live.

Point 2) Also their is no pincode category (ICL/OCL) in employee master. Please correct all 3 sheets for employee rate also. Excel sheet for employee rate is attached below. Please update all the employee rate together in the provided excel sheet with proper data.
Example : (WEST wrong) => (West correct). Values of excel sheet must also match the values as present the system for all the masters otherwise we won't be able to get the ids.

Centre value **Kolhapur** is invalid or may not belong to its parent value at line no 47
Centre value **Kolhapur** is invalid or may not belong to its parent value at line no 48
Centre value **Kolhapur** is invalid or may not belong to its parent value at line no 49
Centre value **Trivendrum** is invalid or may not belong to its parent value at line no 1010
pincode cannot contain duplicate value **160059**. Please check the excel sheet.
pincode cannot contain duplicate value **416009**. Please check the excel sheet.
pincode cannot contain duplicate value **416132**. Please check the excel sheet.
pincode cannot contain duplicate value **416217**. Please check the excel sheet.
pincode cannot contain duplicate value **250003**. Please check the excel sheet.
pincode cannot contain duplicate value **250102**. Please check the excel sheet.

Also for employee rate excel sheet please split all the 3 excel sheet in 5,000 records each.
Cannot import large amount of excel sheet data directly in table. File is unreadable for huge records like 5 lakh.

Errors were found while importing the excel sheet(FE Payout Per Case_DCR) for employee rate for 1st 5000 records.

A text file is attached with the errors.
Please correct and send the corrected excel sheet again we shall check it in local server and then upload on live.
Excel sheet is also attached.

Hello Bhavana,
There is two error available in text file which is
1) **Product value CC is invalid or may not belong to its parent**
=> CC Product not mapped to DCR activity so I removed from excel file.
2) **FE has invalid value or employee is not an Fe : P47204**
=> This emp id is assigned to Supervisor , so I replace this with FE i.e- P47204-1

Correct excel file attached , Please check it.

Hello Sandeep,

I have updated the corrected excel sheet in live using import.

Please use this functionality to import further data into employee rate. Also check the entries after each import is done. If it is proper or not.
