Ajit Kedare | API requirement KVB

Dear Manas / Dipika

As discussed, One of the client has raised the requirement for API implementation, we have shared the Standard format, however we need to customize the API as per their requirements,
KVB have shared the RESPONSE and REQUEST formats attaching the same for your view. kindly help with the same and share the time required for development testing and implementation.

Regards
Ajit.K

Hello sir,

Please schedule a con call today for further discussion, also include Mam Dipika for this call.

After that we may need client con call also for the json format and end points discussion.

Hello sir,

Please update here for email response, as discussed today.
I have also tested as per the export url shared in email but getting blank response.

Using postman if i check it is showing error also, screenshot attached. We are using **form-data** in postman and not **application/x-www-form-urlencoded .** If we use **application/x-www-form-urlencoded** then it is showing success but in XML format**.**
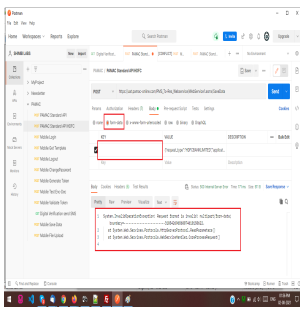

This is fixed for all client and they are using the api in the same way using json and form-data.

Note:

1) We will send json data and accept response in json not XML.

2) We are not sending the post data in **"myjson"** post index, it is directly posted, check the entire post.

3) If data is received properly send json response as :

 a : {"status":"SUCCESS","errorMessage":false}
 b : {"status":"FAILED","errorMessage":"... client error message here..."}

Hello sir,

As discussed with team below are some queries before posting development time , also request mam Dipika to share the new update excel as per new requirement for api from client.

Attached new request and response json format below.

Queries Karur AP for Request :
----
1) Where is VT in request ?
2) Where is Ref no in request ?
3) What is the use of **CallBackURL** field in request ?
4) What are **ApplicantId, NotificationId, clientId , clientbranchId** fields in request ? Do they have any relation in res ?
5) Is there any security like O Auth 2.0 for sending or receiving json data ?

Queries Karur AP for Response :
----
1) What is the use of field **ReportLinks** in resonse ?
2) Whats is the use of **FileNo** in response ?
3) Whats is the use of Field **CaseId** in response ? Is it related to res case id ?
4) What are the use of **VerifierEmpId, BackofficeEmpID** in response ?
5) Will the field **SubmittedFrom** contain both Fe lat and long values as comma separated ?
6) What are the use of fields in JSON below :
"Photos": [
      "<Photo URL>"
],
"CaseClosureAttempts": [],
"OnHoldANTPhotoImageURLs": []
