Import template edit - Database Error | High

Hi,

Please refer the attached screen shot for Database error reflected when I am trying clicking on import template 'T' for the RCU Global import design template.

📄 Database Error.doc

Issue has been resolved. Please verify.
It happened because of character limit of column in database where template ids getting stored.
Previously it was VARCHAR(100) and it exceeding limit and storing value of template ids
like 288,304,305,308,309,310,312,313,314,334,378,318,316,317,333,379,307,311,306,325,336,326,323,320,322,

because of the last comma in value there was a database error occurred.
Now I have increased the limit to VARCHAR(2000).
