Secured Server

During the risk assessment of one of our esteem client it has been bring to our noticed that resoftech is getting access on unsecured link. Please refer the attached print screen.

It was discussed by the Navika in the past too that if any one type the resoftech link as http://pms.resoftech.com it should divert on the secured link - https://pms.resoftech.com

Please check and revert

It has diverted to secured link permanently so please inform Clients using webservices to use https instead of http.

Please check.

As per discussion with Sir Kailash changes are again reverted, please close browser and hard refresh and check.

Please provide the URL's where error are shown due to permanent https:// conversion.
If any webservice is called from mobile app the url needs to be changed to https://

also same must be informed to client who are using live server url to send or receive data.

Confirm the changes and let us know, we shall permanently redirect the http:// to https:// again.

hello,

As per discussion with Sir Siddharth, please make changes to webservice to use https and inform other clients using PAMAC URL to send receive data to use https.

We have to permanently redirect to https by Friday(18-05-2018)

Hello,

1) I have converted redirection from http:// to https:// for admin and user side controllers.
Webservice controllers are not touched, no checking for http:// to https:// conversion is present their.

2) Please check. Try to access any menu or URL using http:// . It should redirect automatically to https://

3) **Note :: Important** ::
If any url is processed using http:// and their is data in post then http:// to https:// redirect won't happen, in order to avoid loss of post data. Since if we redirect when any post data is present then the post data will be lost.

So, this change is temporary , once all the api clients and webservice start using https:// to send data, we shall remove the post checking also and make http:// to https:// redirect permanent.

4) List of controllers are mentioned below ::

User ::
==============================
1) user/userlogin.php
2) user/checkrate.php
3) user/assignment.php
4) user/cases.php
5) user/check_assignment.php
6) user/client_billing.php
7) user/client_case.php
8) user/downloadreport.php
9) user/downloadreportchk.php
10) user/dwreport.php
11) user/export_excel.php
12) user/downloadreport_new.php
13) user/generate_payout.php

14) user/holiday.php
15) user/movingcases.php
16) user/payout.php
17) user/payout_new.php
18) user/payout_summary.php
19) user/quality_check.php
20) user/reports.php
21) user/standard_api.php
22) user/tat.php
23) user/tracking.php
24) user/updatebackup.php
25) user/home.php

Admin :: =======================
1) admin/verify.php
2) admin/master.php
3) admin/admin.php
4) admin/import.php
5) admin/reports.php
6) admin/addpincode.php
7) admin/activity_template.php
8) admin/archive.php
9) admin/assigns.php
10)admin/auto_sms_email.php
11) admin/case_history.php
12) admin/cases.php
13) admin/client_template.php
14) admin/custom_reports.php
15) admin/delete_images.php
16) admin/delete_cases.php
17) admin/fe_product_non_mobile.php
18) admin/master_field.php
19) admin/master_tree.php
20) admin/summary.php
21) admin/template.php
22) admin/template1.php

===========================
Extra or Support files ::

1) add_clientdetails_manually.php
2) addempratemanually.php
3) check.php
4) custom_close_case_bak.php
5) getdeloitimages.php
6) mmt_script.php
7) script_close_case_manually_bak.php

===========================
pamacapi ::

1) pamacapi/client_api.php

===========================

pamac_hr ::

1) controllers/master.php

I have checked cross check and it confirm that http://pms.resoftech.com is getting diverted to https://pms.resoftech.com

Hence it confirmed as closed.
