(All Members) | Archieve Manually

Hi,

Please add Archieve manually menu for Dubai

Added case archive menu in dubai superadmin.
Any further discussion or doubt on this ?

1) There is no problem in the Archive menu in India demo server, However it is not working in dubai live server on study on the same in the local we find that structure of tbl_cases table in original and tbl_cases db backup are not in sync therefore the insert is not happening.
2) We request you to kindly check the above and make the necessary modification in backup table and then let us check the archive menu.
3) This is because demo server does not have dubai database and backup table of dubai.

Hello Prasad,

Please check now, also i think you have live Dubai Db access, you could check it from your end using workbench.

Hello maam please check now and confirm

Need to capture manual archive in case history also as discussed with Manas.

Query
Also what is to be done when case data is moved to archive tbl_cases but the case history data remains it doesn't get move to archive table during manual archive? Do we need to move case history data also to archive or we remove them from both completely?
If we move the case history data to archive then we have to keep only 1 entry in case history table for that case as "Manual Moved To Archive By"

Also what is to be done when case data is moved to archive tbl_cases but the case history data remains it doesn't get move to archive table during manual archive? Do we need to move case history data also to archive or we remove them from both completely?-

Ans- Move case history data also

If we move the case history data to archive then we have to keep only 1 entry in case history table for that case as "Manual Moved To Archive By"
Ans- Ok

Add Archieve menu also, so that we can again move the case to live server as and when require.
