Employee Master | Emergency

Hi,

While changing Employee Code & Login ID system shows error as Employee Code already exist.Though we have make INACTIVE the earlier login.

Hello mam,

This is not a bug, as this process is used from before. The reason Employee Code and Login ID is kept unique for the following reasons :

1) If new user is added with same login id and employee code after deactivating the old one and then again the old one is activated then there will be 2 same login ids.

Solution : Delete the old employee and add new one.

Employee is not deleted from the system so employee-code can not be used.
Please deleted existing employee or change employee-code of inactive employee.

But i think it is a policy issue, Once employee code assign to any employee, it can not be reused.
