Awaiting the timelines for the shared priorities.

For now, we need to urgently make changes to export excel as below:
1) If there are multiple checks of the same VT (BV+BV+RV), then it has to add extra column for the selected field details of second BV
2) Excel row to be one for the same reference number, applicant name & client name, eg: Row 1 has Axis - Navika Desai - 123456 - RV+BV, Row 2 has Axis - Navika Desai - 123456 - RV+ITR+Summary, Row 3 has Axis - Rakhi Gaud - 123456 - RV+BV; then export excel to have one row for all the VTS of row 1 & 2 of input file.

Here, please ensure that if one case inserts a column for 2nd BV, then the second case in the second row should use the same added column for its 2nd BV. The second case should not insert 3rd column for this.

Also, require a provision for having multiple field values in one excel cell.... for example, Remarks of all the VTs is required in one cell then the same number/sequence would be given to remarks of all fields. Like we get for VT field ITR+ITR, similarly. But here, the separation should not be with '+' it should be in the next line within the same cell prefixed with another field/fields that will be selected while designing.

The changes mentioned in the reply at 14.45 :
Hi Navika,

Please find attached sheet for test cases.
There are 3 tabs :
1. current result - Format of current excel export report.
2. single VT twice - Given the example where there is single VT occurs 2 time for same applicant.
3. two VT twice - Given the example where there are 2 different VTs of same applicant occurs twice.

Please check and add if anything missed or anything incorrect.

Hi,

Done with the changes related to export excel sheet.
Tested it on local server.
Uploaded on demo site.
Please verify and confirm.

Hi,

One query on export excel. Do we have an option of choosing export excel in this new form or if we want it in the old format?

Like we have an option whether we want summary for the client or no.

Please elaborate more about your query with example.
Posted By : Navika Desai
D91
Date & Time : 29-03-2016 06:47:PM
For example:
We have an option in 'Summary page' menu whether we want summary for the client and whether we want only summary for the client.

Similarly, can we have an option for export excel to choose whether we want it for single check for one VT only (old format) or multiple checks for one VT (new development)

Date & Time : 12-04-2016 11:38:AM
Hi Navika,

We are not getting your query.
Please give us an example with excel report means what will be changes(settings in template design) and what will be the output according to it.
Or we can discuss it on call.

Rakhi, what is update of call?
Posted By : Rakhi Gaud
D91
Date & Time : 18-04-2016 11:39:AM
Discussed the query with Navika on call.

Query -
can we have an option for export excel to choose whether we want it for single check for one VT only (old format) or multiple checks for one VT (new development)

Ans -
Yes,
we can have this option.
Now, we have changed the code as per new requirement for multiple checks for one VT.
So, we need to do change in export excel code as well as in export excel design module(admin side) to provide the setting option for this.
It will take 2 working days.
