Server space

Hi,

Please share server space usage details... space available & used.

In future this should be shown by Module, so if this is not available in Task least we will add it for future, no need of manual interference

We have checked uploads folder for case images.
Found images of size more than 1MB of cases in India.

Find attached screenshots.

 Created new cron to send the alert via mail when server usage rich to 80% of its total disk space or more than this(above 90%).
Also added one new option in system.
Find attachment of it.
Using this option you can check the current space usage in percentile of domain pms.resoftech.com.
This option is visible to Super Admin only.
