Archive Process

Archiving process
Data will shift from live server to google cloud storage.
System will copy only uploads folder from pms.resoftech.com to cloud storage.
folders/files will be replaced if exist in cloud storage.
Service will run on every month 15th day at 2 AM.

SQL data will also dump on every month 15th day at 3 AM.
dump file name will be database_name-yyyy-mm-dd.sql
example pmsresof_country_11-2016-05-15.sql

One service will run to remove 6 month old files from live server on every month 17th day at 2 am.

One service will run to remove 6 month old records from live database on every month 17th day at 3 am.

One service will run to copy new records from live database to archive database on every month 16th day at 3 am.

We create one archive module which will access only archive database. user can only see records from it and transfer records from archive database to live database.
After transfer you can request for files to retrieve from google cloud storage.
System will process the request and files will copy into live server(it may take one working day to process request).

Files will be copy/delete for all cases there will be no country wise separation.

Date & Time : 01-06-2016 02:33:PM
Few queries that were also discussed:

1) We will need a few columns (12-15) of the cases table to be retained for running dedupe, please comment on its feasibility and function.
2) Data management for templates with fields replaced from field replace module

System will process the request and files will copy into live server(it may take one working day to process request). - this cannot be accepted as we have a process TAT of completing the case within 24 hours.

Date & Time : 09-06-2016 03:41:PM
System will process the request and files will copy into live server(it may take one working day to process request). - this cannot be accepted as we have a process TAT of completing the case within 24 hours.

we have to figure out this, because records are older than 6 months.
And you want within 24 hours then may be its going to be very expensive servers.

So Think let me allow some time to think and you also discuss with your people.

Point 1 and 2 I will ask Kailash to talk to you and understand it.

Posted By : Navika Desai
D100
Date & Time : 09-06-2016 03:48:PM
Point 1 & 2 were discussed with you already while we discussed archive server details.

I will check on the 'one working day' part and confirm.

Date & Time : 22-06-2016 09:52:AM
Can we get a log or data of the files archived?
Posted By : Super Admin
D100
Date & Time : 22-06-2016 11:53:AM
No, but we can share sample screen shot Sure everything you can get but fir that you need to have UNIX expert
Posted By : Navika Desai
D100
Date & Time : 22-06-2016 12:05:PM
Are we keeping a track for our records of what is archived?
Posted By : Super Admin
D100
Date & Time : 22-06-2016 12:06:PM
Yes ... That is what we are testing week long we will continue it for two weeks more
Posted By : Kailash Kumawat
D100
Date & Time : 27-06-2016 09:26:AM
Siddharth sir,
please find excel file for last 6 month cases images, it is approx 60 GB(from 15th dec 2015 to 24th jun 2016). it will increase in future if number of cases increase per day.
system need at least 30 GB space for log(for last 10 days only.) if we have to investigate any case which is more than 10 days old then it will not be possible.
log will also increase in future when operations increase.
about mirroring(of application and database) of current application i think we refuse it.
we are only doing backup of current application on google storage and doing archive process for more than 6 month old cases.
Google storage retrieval process will take at least 10 working hours to retrieve information(it is possible only on working days).
beside this there is no backup/mirror/archive functionality.

Date & Time : 05-07-2016 06:00:PM
Please check point no.19(Archive module) and 48(BCP) on demo site.

For point no.19 provided one option(at admin side only) to move cases from archived.
List will show cases older than 190 days only, and from live site it will remove cases older than 190 days.
There is an option for request files of selected cases.
System will send the notification(via email) to us(kumawat.k@shim-bi.com,gaud.r@shim-bi.com), once we get files, will upload it on live server(this will be done in working days only.).

Point 48 - This is background process.Done by server admin.

Posted By : Navika Desai

Posted By : Navika Desai
D100
Date & Time : 07-07-2016 03:27:PM
Point 19
1) Activity search option required as well.
2) On searching cases, check all option is not available.
3) For Moving: On clicking search - it will directly show the list of closed cases that are older than 190 days?
4) On searching case for example Capri Global client, it will show only closed cases older than 190 days or will it show all cases?
5) Do we have an option of archiving cases that are within 190 days?
6) Move and File request button will work for the selected case from the list only?
7) Can i move and request few cases for testing.

Not completely clear on the functionality. Please help.
Posted By : Kailash Kumawat
D100
Date & Time : 08-07-2016 08:54:AM
point no. 17 is below
Dubai database - all cases, even archived to be moved to live site

which is contradictory from archive process.
Archive process is moving all closed cases automatically from both live databases to archive databases.
DO you need still point 17?

Posted By : Kailash Kumawat
D100
Date & Time : 08-07-2016 09:13:AM
Point 19
1) Activity search option required as well.
reply : Activity search is given, additional zone,center and sub-center search i also given
2) On searching cases, check all option is not available.
reply : check/uncheck all option is given after Action
3) For Moving: On clicking search - it will directly show the list of closed cases that are older than 190 days?
reply : Yes
4) On searching case for example Capri Global client, it will show only closed cases older than 190 days or will it show all cases?
reply : Yes,it will show only closed cases older than 190 days
5) Do we have an option of archiving cases that are within 190 days?
reply : No, within 190 days you can search on live database not on archive database.
6) Move and File request button will work for the selected case from the list only?
reply : Yes, from list only
7) Can i move and request few cases for testing.
reply : Yes, you can do the operations, you can move cases from archive to live.
Only cases moving from live to archive database is automatic process so you can not do it.

Not completely clear on the functionality. Please help.
Functionality is already clear As usual you refine your requirement, once you see anything in action.

I have requested archive retrieval for these cases - 101897751,101897752,101897753. Will these cases be moved to live or demo site (as of testing phase, till we have the module on live)? Let me know once received.

Can we have an additional option to force archive cases that are within 190 days?

Posted By : Kailash Kumawat
D100
Date & Time : 13-07-2016 10:21:AM
not understand your request.
you want to move 101897751,101897752,101897753 cases from demo database to demo archive database?

Can we have an additional option to force archive cases that are within 190 days?
this is additional request, can you increase timeline for this?

Posted By : Navika Desai
D100
Date & Time : 13-07-2016 11:36:AM
I have requested for these cases from archive. So let me know once you receive.
Also i wanted to know whether these cases will move to live / demo site automatically or whether the team will have to upload the details manually.

Yes, this is additional request as i have mentioned. What number of days will be required for this?
Posted By : Kailash Kumawat
D100
Date & Time : 13-07-2016 03:24:PM

cases will be moved automatically from live to archive
from archive to live admin can do it manually.

waiting response about Point 17.

Posted By : Navika Desai
D100
Date & Time : 13-07-2016 04:49:PM
Response to point 17 depends on your response to below points posted on 1-Jun:

1) We will need a few columns (12-15) of the cases table to be retained for running dedupe, please comment on its feasibility and function.
2) Data management for templates with fields replaced from field replace module

As per my discussion with Sid Sir, case data in tbl_cases will remain as it is on live site for dedupe, MIS,etc. purpose. Only user files, logs and images will be moved to archive. Is this being followed in the current archive module developed?
Posted By : Navika Desai
D100
Date & Time : 18-07-2016 06:52:PM
Awaited.
Posted By : Super Admin
D100
Date & Time : 25-07-2016 09:51:AM
All cases are on live server but in archive table. It is impossible to keep building live server for lakhs of data. It will solve down queries and will need huge server resources.

When you need any case you can simple use Archive tab and see them.
Posted By : Navika Desai
D100
Date & Time : 27-07-2016 12:42:PM
If case data is in archive table, then will archive table be used for MIS and dedupe checking?

Appropriate response will eliminate longer conversations.
Posted By : Kailash Kumawat
D100
Date & Time : 28-07-2016 02:45:PM
archive data is only for viewing case information, will not be used in any MIS or dedupe.
Posted By : Navika Desai
D100
Date & Time : 28-07-2016 04:39:PM
Why was this not told earlier?

I had asked and Sid Sir confirmed that data in tbl_cases will be available.

This archive module does not meet the requirement set by us, hence this cannot go on live.

Incorrect development by Shimbi.
**Posted By :** Kailash Kumawat
D100
Date & Time : 28-07-2016 05:16:PM
It was told earlier.
We discuss it at length in november 2015.
dedupe is only for 6 month so you need only 6 month data on live.

This was also told in person that data will not be available for MIS and dedupe after 6 month.
It is not possible to move data partially.
it is a very old points, see your email dated Fri, 20 Nov 2015 13:41:27 +0530
You clearly written, pamac don't need 6 month old data on live server.
please find attachment given with my reply email.
current archive system have same functionality except new domain.

This was discussed with Sid Sir verbally on 31 March. And when asked again in this discussion on 1 Jun again, there was no response.
Posted By : Kailash Kumawat
D100
Date & Time : 28-07-2016 05:34:PM
below points was discussed(both MIS and dedeupe) in november and refused because no meaning to keep records for forever. it will not reduce database load nor mysql performance.
execlsheet(give on 20th nov 2015) was prepared with your discussion and confirmed by you with functionalty.

1) We will need a few columns (12-15) of the cases table to be retained for running dedupe, please comment on its feasibility and function.
2) Data management for templates with fields replaced from field replace module

There is no meaning to give you same answer again and again.
Posted By : Navika Desai
D100
Date & Time : 28-07-2016 05:52:PM
You always assume what is meaningful to you and what is not. Please stop doing that. Answer will have to be given as this is minimum mandatory requirement.

We need only last 6 month data for India, but since this is used for Dubai as well, we need to cater to their requirement. For Dubai, they run dedupe for all data till date.

If data is retained in tbl_cases as confirmed earlier, then the 12-15 columns were not required.

Discussion in Nov was out of date once fresh discussions were done in March 2016. Isnt it obvious. And this discussion went on till Jun 16. You will consider the recent ones or one year old discussion? be logical Kailash.

Refer attached discussion for the same.

I am not even asking for entire tbl_cases, i just asked for 12-15 columns & what will happen if i replace a field in template or change the field. I have not received a straight response to this. I never do.

Either give us what we want or share an alternate.

Let us not waste your time, as you feel so, let me know the solution to this.

14th june discussion was related with google cold storage which was already done.
from march to june we discus about how to reduce server space which is already done by google storage.

This discussion is for database backup.
Let me know do you need database backup or not?
Partial data backup is not possible(few columns).

Posted By : Navika Desai
D100
Date & Time : 02-08-2016 12:32:PM
Kailash,
Did you go through the attachment i had shared? Please read, attaching again

We require below:
1) India Database - archive 6 month old data to cold storage (no record/detail in live is okay)
2) Dubai database - archive 6 month old data to cold storage, however case data (entire case data as per tbl_cases or a few columns) will have to be retained on live to run dedupe and extract MIS
3) The data archived (both database) need to sync with the server for field replacements or any template changes as then the field in live and that in archive for the same field label will be different which is incorrect.

lets discuss if required.

🗄 Server.zip

Posted By : Kailash Kumawat
D100
Date & Time : 02-08-2016 03:23:PM

you are again confused, cold storage is only for case images not for database.

so please don't use cold storage for database.

As per you requirement you need database archive only for india operation.

1) India Database - archive 6 month old data to cold storage (no record/detail in live is okay)

reply : dedupe amd MIS reports will be only from live database and upto 6 months.

From archive database there will be no dedupe and MIS.

2) Dubai database - archive 6 month old data to cold storage, however case data (entire case data as per tbl_cases or a few columns) will have to be retained on live to run dedupe and extract MIS

reply : there will be no archive database for dubai database

3) The data archived (both database) need to sync with the server for field replacements or any template changes as then the field in live and that in archive for the same field label will be different which is incorrect.

reply : yes, field replacement will work for both live and archive database and it is required only for india database as no archive for dubai database.

I need Pravin to send me email that Dubai will carry life time data ...

And this may cause future slow down of queries

And you are ready to invest in servers as space and CPU power to keep website running smooth

Just imagine how much data it will be after 5 years, 10 years, 15 years etc

Please ask Pravin to write me

Posted By : Navika Desai

D100

Date & Time : 02-08-2016 07:44:PM

As of now, for Dubai we require entire data and volume is like 2000 cases a month for Dubai as compared to around 50000-70000 for India.

I ll still ask him to confirm on this.

Posted By : Navika Desai

D100

Date & Time : 08-08-2016 10:47:AM

Discussed and sent a mail for the same.

Dubai case data (tbl_cases) to be retained.

Posted By : Rakhi Gaud

D100

Date & Time : 11-08-2016 02:33:PM

Dubai cases(old cases) have been moved to tbl_cases.

Moved total 9520 cases starting from case_id : 1129 and created date : 2015-02-10.

ending with case_id : 101706918 and created date : 2015-05-31

Please verify and confirm.

D100

Date & Time : 11-08-2016 02:51:PM

What about the cases for which fields have been replaced in the templates after moving the case to archive?

How did we manage that?

The case data for such cases is updated in the old field or new replaced fields?

Posted By : Rakhi Gaud

D100

Date & Time : 11-08-2016 03:09:PM
What about the cases for which fields have been replaced in the templates after moving the case to archive?
- data for such cases is updated in the old field.

How did we manage that?
- We can manually shift the data from old field to new field but for this we need field replacement details.

The case data for such cases is updated in the old field or new replaced fields?
- data for such cases is updated in the old field.
Posted By : Navika Desai
D100
Date & Time : 11-08-2016 03:21:PM
Data in old field is incorrect as the fields have been replaced already for a purpose. And that purpose will not fulfil if the data for old cases goes to old fields.

Archive process needs to have a mechanism to manage field replacement of template design. Please suggest a solution to this.

I have been asking this since the day we started discussion on archive server, but never got a response to that.
Posted By : Rakhi Gaud
D100
Date & Time : 16-08-2016 05:16:PM
1. Data in old field is incorrect as the fields have been replaced already for a purpose. And that purpose will not fulfil if the data for old cases goes to old fields.

- Done.We did it manually by executing the script.
Please verify it on live site.

2. Archive process needs to have a mechanism to manage field replacement of template design. Please suggest a solution to this.

- Done. Now system will update the same in archive database also, changes in code in field replacement module. Please verify it on demo site.
Posted By : Navika Desai
D100
Date & Time : 16-08-2016 05:37:PM
1. How do i verify this on live?

2. How will this function, please explain.
Posted By : Rakhi Gaud
D100
Date & Time : 17-08-2016 09:07:AM
1. To verify check new and old cases(restored from backup).
Compare the values between old and new cases for replaced fields.

2. It is background change, directly changes the values in archive database.You can check this using Archive cases module.
If you replace any field in any template then check any case from archive module of that template to verify that the values have been shifted or not.

Posted By : Navika Desai

D100

Date & Time : 17-08-2016 06:21:PM

1. I have no records of the field replacement changes. In case i replace any fields now, then I will have to wait for the next archive sync I suppose. Hence cannot test it.

2. Tried replacing - Capri Global - RL - BV - field 11 replaced with designation_of_the_applicant, attached is the error, unable to replace.

Date & Time : 23-08-2016 01:56:PM

Please check now.

There was field replacement log table missing on demo site only.

Did some changes in 'Field Replacement' module.

Added list section in first page which shows all field replaced log.

Please verify.

Posted By : Navika Desai

D100

Date & Time : 23-08-2016 02:41:PM

I was now able to replace fields.

I have requested files for cases - 101713093, 101713233

Please let me know once received I shall check the functionality further.

Posted By : Navika Desai

D100

Date & Time : 07-09-2016 11:24:AM

Any update?

Posted By : Kailash Kumawat

D100

Date & Time : 07-09-2016 12:08:PM

email response from Navika on On 07-Sep-2016, at 10:45 AM

-     Dubai case data (tbl_cases) will be retained on live server till the time we confirm otherwise. The images / user files can be archived after 6 months (this is the current function)

-     India case data and user files both to be archived after 6 months (this is also the current function)

We may ask for retrieval of data (images and/or case data) for specific cases as per operational requirement.

Dubai monthly volumes are less than 5% of India volume, hence I don't expect Dubai data to be a reason (if at any time) for server performance.

Rakhi - this point is missed in the conversation trail.

Please let me know on this, posted on 13 Jul:
Can we have an additional option to force archive cases that are within 190 days?

Also as discussed on skype, please document the function for 'File request' and 'Move' button provided in Archive module.
For example, what process do i need to follow if i want case data+images to be retrieved from archive server to the running server (country demo in this case)

And this menu to be moved from profile menu to under Super admin menu.
Posted By : Rakhi Gaud
D100
Date & Time : 12-09-2016 03:48:PM
Can we have an additional option to force archive cases that are within 190 days?
- Yes, we can provide additional option.

Functionality of options 'File request' and 'Move' button -
1. 'File request' : When user select cases and requests for files then system send the notification mail to us(kumawat.k@shim-bi.com,gaud.r@shim-bi.com), once we get files from cloud storage, we upload it on live server and we will inform you about the requested files(this can be done in working days only).
Restored files will get removed while executing the cron running every night at 2 am to remove files older than 6 months, it means user will have access of those files for that day only.

2. 'Move' : Move cases from archived database to live database immediately.
Restored cases will get removed while executing the cron running every night at 2 am to remove cases older than 6 months, it means user will have access of those cases for that day only.

And this menu to be moved from profile menu to under Super admin menu.
- Done. Please check.
Posted By : Navika Desai
D100
Date & Time : 12-09-2016 04:02:PM
Can we have an additional option to force archive cases that are within 190 days?
- Yes, we can provide additional option.
Please provide.

1. If only files/images are received from 'File request', how will user (Super admin) access the files from front end?
2.'Move' will call only for case data right and not files/images?

Menu moved under Super admin - viewed okay.

Have done 'File request' for the cases - 101731213,101731214,101731215

Tried moving the cases - 101731213,101731214,101731215
got the attached error.

Can we have an additional option to force archive cases that are within 190 days?
- Yes, we can provide additional option.
Please provide.
- It will take one day for change in code,uploading and testing on demo site.

1. If only files/images are received from 'File request', how will user (Super admin) access the files from front end?
- Admin can search(given in header part) the case using case id.

2.'Move' will call only for case data right and not files/images?
- Yes, right.

Have done 'File request' for the cases - 101731213,101731214,101731215
- Received mail of notification and restored the files in cases folder.

Tried moving the cases - 101731213,101731214,101731215
- Issue is resolved now.There was an error because of mismatch count of columns in table cases in live and backup database.

Please check.

Can we have an additional option to force archive cases that are within 190 days?
-
Query :
1. Where you want option for this(in which list or need separate page)?

Faced error again attached screen shot, is this because the case is already available in case table?
- Issue is resolved.Please verify.
Posted By : Navika Desai
D100
Date & Time : 16-09-2016 04:33:PM
Where can it be given? Super admin cannot view case list of any menu. hence i think a separate page only will have to be made. Please suggest if any other possibility

Issue resolved, why was the issue?

Posted By : Rakhi Gaud
D100
Date & Time : 20-09-2016 03:10:PM
Issue occurred because case is already available in case table.Now, system check it before moving case in live cases table.

Where can it be given? Super admin cannot view case list of any menu. hence i think a separate page only will have to be made. Please suggest if any other possibility
- Yes. we will create new menu for this.It will be fixed and accessible to Super Admin only(under super admin main menu).
Search option will be same as search filters in 'case details MIS'.
Multiselect Dropdowns - Zone,center,subcenter,client,activity,product and verification type.
Date Range - Added Date.

List -
After search list will be displayed.It will show send to client cases only.
Columns - Case id, Ref No, Applicants Name, Client Name
Last column will show select All option with checkbox.

Below the list page there will be a button named as 'Move To Archive', on click of this button system will move case from live database to archive database.

D100
Date & Time : 29-09-2016 07:14:PM
Done with the changes for extra menu in Archive module:
Added new menu 'Archive Manually' which is visible to super admin only.
On search it shows the list of all close(send to client done) cases.
Onclick on of 'Move to Archive' button system moves the selected case in archive database.

Please verify.

Only one change is remained that -
Show forcefully archived cases also in 'Archive List' page(menu 'Archive').
**Posted By :** Navika Desai
D100
Date & Time : 30-09-2016 11:26:AM
Archive manually shows only send to client cases - okay
Archive manually tested with cases moved to archive - 102025996, 102025997 - okay
the mentioned two cases not found in the database, screen shot attached - okay

Let me know once the other changes are done.

D100
Date & Time : 13-01-2017 05:39:PM
I will do it on Monday.
Posted By : Rakhi Gaud
D100
Date & Time : 16-01-2017 06:40:PM
Today I did changes cron running to delete images of cases older than 6 months.
Now, I have changed it to images of cases(closed only and except Delloite cases) older than 95 days.

Uploaded and set it on demo site.
Tomorrow I will execute it on live site to check no of images first.
And then will set cron for every day execution.
Time of execution will be : 4AM(everynight).
Posted By : Rakhi Gaud
D100
Date & Time : 18-01-2017 05:15:PM
changes in cron to delete images of cases older than 3 months.
After discussion with Navika,did some changes in cron file
i.e. system should check cases older than 95 days by its send to client date instead of its created date.
Uploaded these changes on live site.

Also enabled the menus for Case Archive on live site.

Please verify and confirm.
Posted By : Navika Desai
D100
Date & Time : 19-01-2017 10:44:AM
Auto archive cron to run on send to client date.

Manual archive function tested okay with case 102374948:
-Case manually archived
-Cases not shown on search in software
-Case is shown in archive list on search
-Case moved back to live on move button

Auto archive:
-Images (thhumbnails of images in pdf) are not seen in any of the pdf reports of archived cases. Is it the
functionality? Case id: 102264489, 102264490
Posted By : Rakhi Gaud

D100
Date & Time : 20-01-2017 11:13:AM
If images are archived then it will not be seen in pdf/view of archived cases.
Because system shows images if it is available on pms server.

And as per change, now we are archiving images of closed cases older than 95 days by its send to client date.

102264489 - 2016-07-16 12:31:23(send to client date)
102264490 - 2016-07-14 17:46:13(send to client date)

Date & Time : 22-03-2017 12:00:PM
Please revert.

Server space usage is 88%
Posted By : Rakhi Gaud
D100
Date & Time : 22-03-2017 12:31:PM
What are the other scenarios when the images/data will continue to remain on the server?
- No other scenario.

Posted By : Navika Desai
D100
Date & Time : 23-03-2017 11:56:AM
Please make the below changes with respect to archive functionality

I) Normal case:
1. Cases auto archive 3 months after send to client date
2. Images to be moved to cold storage 3 months after send to client date

II) Manual archive
1. Cases to be archived manually by user
2. Images of manual archive cases to be moved to cold storage on manual archiving

III) Soft Deleted case
1. Send to client done cases:
a) Cases to be moved to archive 1 month after soft delete date
b) Images to be moved to cold storage 1 month after soft delete date
2. Send to client not done cases:
a) Cases to be moved to archive 1 month after send to client date
 b) Images to be moved to cold storage 1 month after send to client date

IV) Hard deleted case
1. Archiving is not applicable as case data is completely removed from the database

V) Additional search filter for Send to client date range in Manual archive menu.
VI) Additional search filter for case ID for Archive menu (retrieval of case)

Let me know the time required for this and the schedule.
Posted By : Rakhi Gaud
D100
Date & Time : 23-03-2017 04:13:PM
It will take 3 days with uploading changes on demo site only.
Currently I am working on some changes/issues(because of big data in cases table) in cron files.
I complete the cron related changes by tomorrow.
After that I will work on these changes.

If these changes are on highest priority then we can start it from tomorrow.
Posted By : Navika Desai
D100
Date & Time : 23-03-2017 04:21:PM
Complete the cron tomorrow and then start on this.

Tomorrow Just run a script to move images of archived cases to cold storage.
Posted By : Rakhi Gaud
D100
Date & Time : 24-03-2017 10:16:AM
Tomorrow Just run a script to move images of archived cases to cold storage.
- We can remove images of cases archived before today only. We will just remove images of archived cases form
live server.

Because, moving images of cases is an automatic process done by admin at every midnight.
Using script we can not move/copy/delete any image from cloud storage.

D100

Date & Time : 25-03-2017 01:39:PM
I have manually archived Deloitte cases, please move the images to cold storage.
Posted By : Rakhi Gaud
D100
Date & Time : 27-03-2017 09:33:AM
Done with the preparation and execution of script to remove images of manually archived cases.
Posted By : Rakhi Gaud
D100
Date & Time : 27-03-2017 10:39:AM
I) Normal case:
1. Cases auto archive 3 months after send to client date
2. Images to be moved to cold storage 3 months after send to client date

III) Soft Deleted case
1. Send to client done cases:
a) Cases to be moved to archive 1 month after soft delete date
b) Images to be moved to cold storage 1 month after soft delete date
2. Send to client not done cases:
a) Cases to be moved to archive 1 month after send to client date
 b) Images to be moved to cold storage 1 month after send to client date

- These changes will be applicable to all cases(including Delloite and Dubai cases)?
Posted By : Navika Desai
D100
Date & Time : 29-03-2017 09:47:AM
Have you moved Deloitte case images from archive to cold storage?
Server space usage is still 88%.

- These changes will be applicable to all cases(including Delloite and Dubai cases)?
< These changes will be applicable to Deloitte cases, not Dubai cases. Logic for Dubai cases archival will remain as it is currently.

Below is the corrected one:
III) Soft Deleted case
1. Send to client **not** done cases:
a) Cases to be moved to archive 1 month after soft delete date
b) Images to be moved to cold storage 1 month after soft delete date
2. Send to client done cases:
a) Cases to be moved to archive 1 month after send to client date
 b) Images to be moved to cold storage 1 month after send to client date
Posted By : Rakhi Gaud
D100
Date & Time : 29-03-2017 11:38:AM
Have you moved Deloitte case images from archive to cold storage?
 - Yes, we did it on Monday(morning).

- These changes will be applicable to all cases(including Delloite and Dubai cases)?
< These changes will be applicable to Deloitte cases, not Dubai cases. Logic for Dubai cases archival will remain as it is currently.
 - Okay.
But logic for removing all images(India-Dubai) older than 190 days will remain same.

Posted By : Navika Desai
D100

1 day also the cases records are more than 4 lakhs for earlier 6 months. The script needs to be changed according
because there are limitations of script execution time at one go, we have to keep on redirecting to the script
function to get it done, as such it will take some time.

We are currently working on D145 Character limitation for Default value. We shall work on this on 14th July
2017.
Current Disk usage : 159.65 GB / 185.55 GB (86%).
Should we move earlier 6 months cases to live from archive.

Hello Bhavana ,

Change - cases data in tbl_cases to be auto archived after 6 months(Only India) of send to client.
Requested by Navika Madam on 27-Jun-2017.
Please update on it.

Please update on above.

Also, what are the current crons, scripts for case data & image archiving & moving to cold storage?

Image of case id - 102618146 is available in uploads folder.
Send to client for the case is done 21 Dec 2016.
Why is it not archived as per the cron?
